eHB
Enterprise Health Broker

eNTERPRISE HEALTH BROKER [eHB] is a messaging engine that drives change across a Health Enterprise to make a difference. Using the latest technology, Central Data Networks (CDN), has amalgamated knowledge and technology with the minds of many, simplifying user interfaces and accomplishing complete interoperability among healthcare information protocols.

Virtually any universal standards are converted to communicate with formal standards between your EMR, HIS, RIS, PAS, LIS, EHR etc, between various vendors. Includes interface standards conversions between HL7 2.x to HL7 3.x or HL7 to XML or HL7 to Web services, etc

Driving the future of healthcare integration with eHB ensures projects can be completed quickly with guaranteed reliability.

INNOVATIVE INTEGRATION

- ✓ Intuitive interface
- ✓ Simplified standards support
- ✓ Connect your data
- ✓ Database integration
- ✓ Integrated lookup tables
- ✓ Rapid deployment
- ✓ Easy interface management
- ✓ Guaranteed delivery
- ✓ Transform your data
- ✓ Custom formats

eHB KEY FEATURES

- ✓ No programming required
- ✓ Uses web-based monitoring
- ✓ Stable and secure
- ✓ Pre-built Interface library
- ✓ Multiple data formats
- ✓ No VPN connection required
